Dear [Hiring Person]

I have about two years of experience in data analytics, and I am eager to bring my skills to the [position]. My expertise in SQL, Power BI, R and Python, as well my statistics background, would make me a great addition to your team.

In my current role at Aegro (an ag-tech company), I have worked on a number of projects that have given me a strong understanding of database management systems and business trends. I helped to develop the Sales Department Power BI structure, and did KPI analysis that contributed to some of the best results since the start of the company.

During my BS in Statistics, I also worked on projects that have developed my statistical data analysis, data science and machine learning knowledge. Some examples are survival analysis, forecasting, credit score analysis and NLP.

I would love the opportunity to discuss some of your upcoming projects and how my skills could help. Please feel free to contact me to arrange a time to chat. Thank you very much for your time and consideration.

Sincerely,

Nicolas M. Hahn
